SKILLS

- Programming & Web Development : Front-end & Back-end
- Data Analysis & Task Automation
- Database Management
- IT Troubleshooting & Systems Administration : Windows, Linux
- Embedded Systems & Circuit Design
- Software Debugging & Testing
- Problem Solving & Critical Thinking
- Collaboration & Communication
- Time Management
- Fast Learning & Adaptability

EDUCATION

CAGAYAN STATE UNIVERSITY

Tuguegarao City, Cagayan Valley

Bachelor of Science in Computer Engineering

Aug 2021 - Jul 2024

SUMMARY

I have hands-on experience in data encoding, data analysis, data management, and IT support. Currently working as a backend developer building server-side systems with PHP and MySQL. Comfortable in both Windows and Linux environments. I enjoy solving technical problems and learning new tools.

WORKING EXPERIENCE

DATA ENCODER - PART TIME

GMA TV13 - Relay Station ***Dec 2019 - Jul 2024***

- Accurately encoded data to support reports and office workflows. Verified information to maintain data integrity and consistency.

IT STAFF - PART TIME

Lyceum of Aparri - Hospital ***Jan 2023 - Jul 2024***

- Troubleshot hardware and software issues to maintain smooth IT operations. Managed data flow to support efficient hospital operations.

DATA ANALYST

Interactech Solutions Inc. ***Oct 2024 - Mar 2025***

- Conducted product and web gameplay testing to ensure data accuracy, functionality, and performance quality. Utilized SQL and Excel to analyze test results, identify trends, and provide actionable insights for improving game quality.

DATA MANAGEMENT ANALYST

One Visaya Gaming Corp. ***Mar 2025 - Jun 2025***

- Streamlined data processing tasks to maintain accuracy and consistency. Conducted and documented web gameplay tests, identifying bugs and suggesting improvements for better user experience.

BACK END DEVELOPER

Cebuanas Encoding Services ***Nov 2025 -***

- Developed and maintained server-side functionality using PHP and MySQL. Built dynamic parameterized queries to improve code reusability and security. Optimized database operations and implemented scalable backend solutions.
